**SCE:** David Balandran, Colin Cushnie, Gene Lee, Andrew Park, Justin Dillon, Phil Schofield, Leo Dalusong, Justine Chao, Josh Copenhagen, Joseph Yan

**ACTION ITEMS:**

Renewable Curtailment Update

1. In conducting this review of negative prices, have you performed any analysis that might inform/determine what the marginal resource appears to be?
2. Although the frequency of negative DAM pricing appears to be rising, the magnitude appears to be decreasing – is this something you saw in your analysis?
3. Regarding the dispatch visibility and operational challenges you've encountered, how have you engaged with the ISO? Through a stakeholder initiative or solely through conversations as the SC?
4. Of the projects with economic curtailment provisions, what percentage do the 2300 MWs represent?
