

Atento Circuit Plan

Planned Work:

- New insulated wire has already been installed in various places on the circuit
- Plan involves replacing an additional 22 miles of bare overhead wire with new insulated wire, to fully cover the circuit outside of the operational protocol area
- Implement operational protocols to raise PSPS windspeed thresholds

Expected Completion Date:

- August 2021

Expected Improvements:

- **47% reduction** in customer outage time, assuming the same weather conditions in 2020
