

SADDLEBACK CIRCUIT PLAN

Planned Work:

- Replace 4.8 miles of existing bare overhead wire with new insulated wire
- Add new weather station near end of the circuit to improve situational awareness

Expected Completion Date:

- September 2021

Expected Improvements:

- **57% reduction** in customer outage time, assuming the same weather conditions in 2020
- Additional benefits from new weather station are anticipated, but magnitude of benefits is unknown
