

Schedule D-SDP
DOMESTIC SUMMER DISCOUNT PLAN

Sheet 1

APPLICABILITY

The Summer Discount Plan (D-SDP) is applicable to domestic service customers residing in an individually metered single-family accommodation with central air conditioning where a portion of the customer's electrical load is subject to disconnection, as initiated by an SDP Event Trigger, from SCE's service by SCE through a direct load control device, with or without optional customer-controlled override capabilities. Service pursuant to this Schedule shall be subject to adequate signal strength for control of the direct load control device, availability of direct load control devices, and acceptable operating condition of the air conditioning unit. This Schedule is not applicable to customers receiving a Medical Baseline Allocation for air conditioning, or to customers receiving service under Schedules DM, DMS-1, DMS-2, DMS-3, DS, or Schedule PCT. (T)

In order to participate under this Schedule, Customers must have the appropriate SCE direct load control device installed, programmed, and activated.

TERRITORY

Within the entire territory served.

RATES

The rates as applicable under the customer's Otherwise Applicable Tariff (OAT) shall apply, except the customer's bill shall be reduced by the following applicable credit:

Standard Option:

Direct load control device;

100% Cycling Strategy: \$(0.36) per Summer Season day per connected ton of central air conditioning for 100% Cycling

50% Cycling Strategy: \$(0.18) per Summer Season day per connected ton of central air conditioning for 50% Cycling

Override Option:

Direct load control device equipped with customer override capability. Customers will be permitted to override 5 SDP Event days per calendar year for each load control device by physically accessing the direct load control device on the air conditioning compressor. The air conditioning unit must be installed at ground level.

100% Cycling Strategy: \$(0.18) per Summer Season day per connected ton of central air conditioning for 100% cycling

50% Cycling Strategy: \$(0.09) per Summer Season day per connected ton of central air conditioning for 50% cycling

In no event shall the amount of credit exceed the amount of the Distribution portion of the Energy Charge plus the total charge for generation of the customer's bill as calculated under the customer's OAT. Also, the Basic Charge, as shown on the customer's OAT, shall apply.

MINIMUM CHARGE: The Minimum Charge provision of the customer's OAT shall apply.

Schedule D-SDP
DOMESTIC SUMMER DISCOUNT PLAN

Sheet 2

(Continued)

SPECIAL CONDITIONS

1. SDP Event: An SDP Event is the disconnection of a portion of the customer's electrical load utilizing the direct load control device. An SDP event will be initiated as defined in Special Condition 5. Each SDP Event will conform to the applicable Cycling Strategy: 100% cycling disconnects the air conditioning compressor for up to 30 minutes out of every 30 minutes and 50% cycling disconnects the air conditioning compressor for up to 15 minutes out of every 30 minutes. SDP Events may be called year round. A credit, in accordance with the rates above, will commence on the meter read date of the first Summer Season billing month following completion of the installation of the applicable direct load control device and shall continue each month of the Summer Season thereafter whether or not any SDP Event has been initiated during that month.
2. The summer season shall commence at 12:00 a.m. on June 1 and continue until 12:00 a.m. on October 1 of each year. The winter season shall commence at 12:00 a.m. on October 1 of each year and continue until 12:00 a.m. on June 1 of the following year.
3. Direct Load Control Device: SCE, at its own expense, will furnish, own, operate, and maintain the direct load control device installed by SCE or its designated contractor at each customer's premises.

For customers electing the Override Option of this Schedule, SCE will furnish, own, operate, and maintain a direct load control device that allows customers to override participation during an SDP Event. Customer's central air conditioning unit must be installed at ground level and accessible to SCE or its designated contractor.

4. Term of Service: Service under this Schedule shall be for a minimum of one year from the date on which service under this Schedule begins. The minimum of one year restriction does not apply when a member of a customer's household develops a serious medical condition that is substantiated by a medical provider subsequent to program enrollment that in SCE's reasonable discretion disqualifies the customer from participation in this program.
5. SDP Event Trigger: An SDP Event may be triggered and the air conditioning compressor cycled off upon any of the following situations:
 - a. At the discretion of the California Independent System Operator (CAISO) for emergency purposes;
 - b. Upon determination by SCE's grid control center of the need to implement load reductions in SCE's service territory;
 - c. At the discretion of SCE's energy operations center in response to high wholesale energy prices;
 - d. At the discretion of SCE for program evaluation or system contingencies.
 - e. At the discretion of SCE, when the CAISO has issued an Alert or Warning Notice. (N)

SPECIAL CONDITIONS (Continued)

6. SDP Event Period:

The number of SDP Events triggered under Special Condition 5, Subsections 5.a., 5.b., 5.c., and 5.d. is unlimited, but the total SDP Event hours triggered under Special Condition 5, Subsections 5.a., 5.b., 5.c., and 5.d. are limited to a cumulative total of no more than 180 hours per calendar year, per service account. Multiple SDP Events per day are possible, but the cumulative event hours are limited to a total of no more than 6 hours per day, per service account. In the event of a system emergency, SCE may, at its discretion, extend an SDP Event beyond the 6 hour limit. However, no new SDP Event will be initiated after the 6 hour limit has been met. (C)

7. Customer Option Change: At the customer's request, subject to device availability, Customers may change their Option (Standard or Override) one time within each 12-month period of service under this Schedule.

8. Cycling Strategy Change: At the customer's request, SCE shall change the Cycling Strategy for participating SDP customers as follows:

a. Customers may change their Cycling Strategy from 50% Cycling Strategy to 100% Cycling Strategy at any time under this Schedule.

b. Subject to device availability, customers may change their Cycling Strategy from 100% Cycling Strategy to 50% Cycling Strategy one time within each 12-month period of service under this Schedule.

9. Direct Access (DA) and Community Choice Aggregation Service (CCA Service): A customer receiving DA or CCA Service shall notify its Energy Service Provider (ESP) or Community Choice Aggregator (CCA), as applicable, and Scheduling Coordinator that its air-conditioning load is subject to SDP Events under this Schedule.

10. Relationship to Other Demand Response Programs: Customers' service accounts on this Schedule may additionally participate on Schedule CPP. For CPP customers' service accounts dual participating with this Schedule, the sum of credits provided by the D-SDP and CPP programs will be capped. The capped credit amount, also known as the Maximum Available Credit, is listed per the customer's OAT in the applicable rate section of Schedule CPP.
