
First Addendum to Appendix A – WDT1204

[REDACTED]

[REDACTED] Project

QUEUE CLUSTER 7 PHASE I REPORT

January xx, 2015

This study has been completed in coordination with the California Independent System Operator Corporation (CAISO) per CAISO Tariff Appendix DD Generator Interconnection and Deliverability Allocation Procedures (GIDAP)

Interconnection Study Document History

No.	Date	Document Title	Description of Document
2	01/xx/2015	First Addendum to Queue Cluster 7 Phase I Appendix A – WDT1204	Addendum to: reflect appropriate cost associated to the [REDACTED] allocated to the Project, include cost for programming work associated with installing the required [REDACTED] and rectify the ITCC calculation associated with the escalated Distribution Upgrades dollar.
1	12/17/2014	Queue Cluster 7 Phase I Appendix A – WDT1204	Final Queue Cluster 7 Phase I Appendix A

[REDACTED] the Interconnection Customer (IC), received a Cluster 7 Phase I study report dated December 17, 2014 for its Interconnection Request (IR) to Southern California Edison Company's (SCE) for their proposed [REDACTED] (Project) interconnecting to the [REDACTED] Circuit located in Goleta, Santa Barbara County, California, queue position WDT1204.

Subsequent to the release of the QC7 Phase I report package for the Project dated December 17, 2014 it was determined that the Escalated Cost and Time to Construct for Interconnection Facilities, Reliability Network Upgrades, Delivery Network Upgrades, and Distribution Upgrades (Attachment 2 to Project Appendix A report dated December 17, 2014) erroneously specified a \$1k dollar value for the [REDACTED] SPS costs allocated to the Project. The actual costs allocated to the Project for the [REDACTED] is \$9k.

In addition, it was determined that the cost associated with programming the substation [REDACTED] to add [REDACTED] for the [REDACTED] required by the Project was inadvertently omitted from the Escalated Cost and Time to Construct for Interconnection Facilities, Reliability Network Upgrades, Delivery Network Upgrades, and Distribution Upgrades (Attachment 2 to Project Appendix A report dated December 17, 2014).

Lastly, the ITCC costs associated with the escalated Distribution Upgrades dollars was updated to reflect the appropriate amount in the Escalated Cost and Time to Construct for Interconnection Facilities, Reliability Network Upgrades, Delivery Network Upgrades, and Distribution Upgrades (Attachment 2 to Project Appendix A report dated December 17, 2014).

Consequently, the document(s) below from the QC7 Phase I report package dated December 17, 2014 has been updated accordingly, and is attached as part of this QC7 Phase I Addendum report package. The corresponding changes replace and supersede those same sections in the Project's QC7 Phase I Appendix A report for WDT1204.

1. Escalated Cost and Time to Construct for Interconnection Facilities, Reliability Network Upgrades, Delivery Network Upgrades, and Distribution Upgrades (Attachment 2 to Project Appendix A report dated December 17, 2014).

Summary of changes:

Replace the following in the QC7 Phase I report package:

- a. Escalated Cost and Time to Construct for Interconnection Facilities, Reliability Network Upgrades, Delivery Network Upgrades, and Distribution Upgrades (Attachment 2 to Project Appendix A report dated December 17, 2014) to reflect the change(s) mentioned above.

The remainder of the WDT1204 Appendix A report dated December 17, 2014 is unchanged.
