# **Addendum to Appendix A – WDT1307**

---

[REDACTED]

[REDACTED]

## **Addendum #1**

### **Cluster 8 Phase I Final Report**

**March 4, 2016**

This study has been completed in coordination with the California Independent System Operator Corporation (CAISO) per Southern California Edison Company's Wholesale Distribution Access Tariff, Attachment I Generator Interconnection Procedures (GIP)

Project No.	Project Name	No	Date	Document Title	Description of Document
WDT1307	██████████	2	3/4/2016	Addendum #1 to Queue Cluster 8 Phase I Appendix A Final Report	The purpose of this report is to update Attachment 2's ITCC component associated with the Distribution Grades assigned to this Project; and publish the written comments provided by the IC to SCE in accordance with the timelines stated per Section 4.5.7 in GIP
WDT1307	██████████	1	1/15/2016	Queue Cluster 8 Phase I Appendix A Final Report	Report to disclose results of QC8 Phase I cluster.

## Executive Summary

[REDACTED] an Interconnection Customer (IC), received a Queue Cluster 8 Phase I (QC8 Phase I) study report dated January 15, 2016 for its Interconnection Request (IR) to Southern California Edison (SCE) for their proposed [REDACTED] queue position WDT1307.

During the Phase I study results meeting of the Project on February 19, 2016, subsequent to the release of the QC8 Phase I report package for the Project dated January 15, 2016 it was determined that the following item(s) in the QC8 Phase I report package for the Project required an update to reflect the appropriate duration and estimated costs associated with the Interconnection Facilities allocated to the Project.

1. Escalated Cost and Time to Construct for Interconnection Facilities, Reliability Network Upgrades, Delivery Network Upgrades, and Distribution Upgrades (Attachment 2 to Project Appendix A), during the results meeting it was determined that the ITCC component of the Distribution Upgrades was inadvertently not calculated, and consequently was to be updated to reflect the appropriate figure.

Subsequent to the release of the QC8 Phase I report package for the Project dated January 15, 2016, to comply with GIP obligation to IC's written comments on interconnection studies as modified by FERC Order 792, SCE is publishing any written comments submitted by the IC:

- Within ten (10) Business Days of receipt of the QC8 PI report, but in no event less than three (3) Business Days before the Results Meeting conducted to discuss the report; and/or
- Additional comments on the final QC8 Phase I Interconnection Study report up to (3) Business Days following the Results Meeting

This addendum report discloses below the written comments provided by the IC to SCE in accordance with the timelines stated in GIP for QC8 Phase I study report dated January 15, 2016, and the Phase I study report is unaffected by this addendum report.

**Escalated Cost and Time to Construct for Interconnection Facilities, Reliability Network Upgrades, Delivery Network Upgrades, and Distribution Upgrades**

QC8 Phase I – WDT1307 – [REDACTED]

1. Written comments provided by IC within ten (10) Business Days of receipt of the QC8 PI report.

WDT 1307, 1308, 1309 Phase I results question.

**QC8 Phase I Study Report Attachment #2**

Attachment 2:

Distribution Upgrade:

[REDACTED] (WDT 1307)

Is the time to design and construct interconnection facilities and distribution upgrades accurate?

Phase II Study:

Does this project qualify for WDT Fast Track?

2. Written comments provided by IC three (3) Business Days following the Results Meeting.
  - a. None
