## **Addendum #2**

### **Cluster 5 Phase II Final Report**

**February 5, 2016**

This study has been completed in coordination with the California Independent System Operator Corporation (CAISO) per CAISO Tariff Appendix DD Generator Interconnection and Deliverability Allocation Procedures (GIDAP)

### Interconnection Study Document History

Project No.		No	Date	Document Title	Description of Document
WDT938	██████████ ██████████	3	2/5/2016	Addendum #2 to Queue Cluster 5 Phase II Appendix A Final Report	The purpose of this report is to reflect the latest Project scope and cost per the GIA discussions up to date.
WDT938	██████████ ██████████	2	1/7/2014	Addendum #1 to Queue Cluster 5 Phase II Appendix A Final Report	The purpose of this report is to reflect the treatment of the one-time costs as applicable per the specific upgrade classification allocated to the Project in the Appendix E of the Area Report.
WDT938	██████████ ██████████	1	12/6/2013	Queue Cluster 5 Phase II Appendix A Final Report	Report to disclose results of QC5 Phase II cluster.

## Executive Summary

\_\_\_\_\_ submitted a completed Interconnection Request (IR) to the Southern California Edison Company (SCE) for their proposed \_\_\_\_\_ under the terms of SCE's Wholesale Distribution Access Tariff (WDAT), WDAT938, queue position WDT938. Subsequent to the submittal of the completed IR, \_\_\_\_\_ transferred ownership of the Project to \_\_\_\_\_ the Interconnection Customer (IC).

During the Generator Interconnection Agreement (GIA) negotiation phase of the Project, SCE determined the following changes to the QC5 Phase II Interconnection Study report:

1. The duration to \_\_\_\_\_ from \_\_\_\_\_ back to \_\_\_\_\_ would have a duration of \_\_\_\_\_ with the assumption that no licensing is required. In the event that licensing is required, the duration to complete this work may likely increase.
2. The Interconnection Facilities (IF) required for the Project to interconnect at \_\_\_\_\_ were updated from those identified in the QC5 Phase II study report dated December 6, 2013, including the elimination of \_\_\_\_\_ based upon the final engineering and design of the Interconnection Facilities being constructed for the WDT433 Project.

Consequently, SCE determined that another addendum report to the QC5 phase II report package for the Project was required to reflect the most up to date scope and costs for the Project.

The following identifies the sections and/or corresponding changes to replace and supersede those same sections in the IC's QC5 Phase II Appendix A study report dated December 6, 2013:

1. Interconnection Facilities, Network Upgrades and Distribution Upgrades(Attachment 2 to Project Appendix A report dated December 6, 2013)
2. Escalated Cost and Time to Construct for Interconnection Facilities, Reliability Network Upgrades, Delivery Network Upgrades, and Distribution Upgrades (Attachment 3 to Project Appendix A report dated December 6, 2013)

These item(s) have been updated accordingly, and are attached as part of this QC5 Phase II Addendum report package.

The remainder of the original report is unchanged.
